Test Case	Input	Result
Valid Form ✅	Fill in every required field correctly; use a 7-digit student ID, a valid UH email, a topic of at least 10 characters (watching how the character count changes), and time 10:00 AM	Time message states "`Time is available.`" Status changes to "`Request status: Submitted.`"
Boundary Tests (Times) ✅/⚠️	Complete the form but select 1. Exactly 9:00 AM 2. Before 9:00 AM 3. 4:45 PM	1. 9:00 is valid: "`Time is available.`" 2. Error message appears: `Please select a time between 9:00 AM and 4:45 PM in 15-minute increments.` And pop-up window: `Value must be 9:00 AM or later.` However, it does not show `Request status: Failed` – it shows `Request status: Not Submitted` 3. Time passes because 4:45 PM is before 5:00 PM; status becomes Submitted
Conditional Failure ✅	Select exactly 5:00 PM	Error message appears: `Please select a time between 9:00 AM and 4:45 PM in 15-minute increments.` Status becomes `Request status: Validation Failed.`
Blank Required Field ✅/⚠️	Leave Student ID blank but fill out the other fields correctly.	Browser's required-field validation blocks submission and sends the user back to the part of the page/field that is incomplete. Does not show `Request status: Validation Failed` but instead keeps `Request status: Not Submitted`
Invalid Field ✅/⚠️	Enter 1234 instead of 7 digits; complete all other fields correctly	Browser blocks submission because the Student ID does not match the 7-digit pattern and sends the user back to the part of the page/field that is incomplete. Does not show `Request status: Validation Failed` but instead keeps `Request status: Not Submitted`
